Notice of Possible Fee Increase on October 1, 2002

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2002, then the amount due may be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there may be an increase in fees effective on October 1, 2002. See Revision of Patent and Trademark Fees for Fiscal Year 2003: Notice of Proposed Rulemaking, 67 Fed. Reg. 30634, 30636 (May 7, 2002). Although a change to the amount of the publication fee is not currently proposed for October 2002, if the issue fee or publication fee is to be paid on or after October 1, 2002, applicant should check the USPTO web site for the current fees before submitting the payment. The USPTO Internet address for the fee schedule is: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of any fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after October 1, 2002 (or mailed with a certificate of mailing on or after October 1, 2002), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Frederick Burkhardt on 9/30/02.

The application has been amended as follows:

a) cancel claims 93-115, 138-159,

b) amend claim 116 as follows:

116. (Amended) A vehicle monitoring system, comprising:

a photosensor array having a field of view of an area of interest in an interior [of a] compartment of a vehicle and [adapted] positioned for capturing an image of at least one imaged object at said area of interest, said photosensor array comprising a plurality of photosensor elements arranged in a predefined array;

an illumination source illuminating said area of interest, said illumination source comprising an infrared illumination source for radiating in a bandwidth that is outside the visible light spectrum; and

a control responsive to an output of said [sensor] photosensor array for detecting [said] the at least one imaged object, said photosensor array resolving said area of interest in accordance with said predefined array, said control processing image data that are geometrically associated with a geometric arrangement of said predefined array, and said control selecting particular image information by analyzing particular

groupings of said predefined array while ignoring other image information imaged by other groupings of said predefined array so as to be [being] responsive to image information chosen from at least one of presence, size, shape, contour and motion of the [imaged object] at least one object at said area of interest.

REASONS FOR ALLOWANCE

The following is an Examiner's Statement of Reasons for Allowance:

The claims are allowable over the prior art for at least the reason that the prior art fails to reasonably teach or suggest a control responsive to an output of said photosensor array for detecting the at least one imaged object, said photosensor array resolving said area of interest in accordance with said predefined array, said control processing image data that are geometrically associated with a geometric arrangement of said predefined array, and said control selecting particular image information by analyzing particular groupings of said predefined array while ignoring other image information imaged by other groupings of said predefined array so as to be responsive to image information chosen from at least one of presence, size, shape, contour and motion of the at least one object at said area of interest as set forth in the claimed combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably
